

CHANDAN ROY

Flutter Developer | Dart | Firebase | REST APIs | BLoC | Provider | Riverpod | Android & iOS
Haridwar, Uttarakhand, India | +91 88698-46824 | cr717753@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Flutter Developer with 1.5+ years of professional experience designing, developing, and deploying high-performance cross-platform Android and iOS mobile applications using Flutter and Dart. Proficient in state management (BLoC, Provider, Riverpod), REST API integration, Firebase services, clean architecture, and SOLID principles. Delivered 15+ production apps with 10K+ downloads; proven track record of end-to-end app lifecycle ownership, performance optimisation, and cross-functional team collaboration in startup and agency environments.

TECHNICAL SKILLS

Languages & Frameworks: Flutter, Dart, FlutterFlow, Python, C, C++, C#, ASP.NET, HTML, CSS

State Management: BLoC, Provider, Riverpod, MVVM

Mobile Development: Android, iOS, cross-platform development, custom widgets, responsive UI, animations, app lifecycle

Firebase & Cloud: Firebase Authentication, Cloud Firestore, Realtime Database, FCM, Cloud Functions, Firebase App Check, Crashlytics, Supabase, AWS S3

APIs & Integrations: REST APIs, WebSockets, Google Maps API, geolocation, push notifications, in-app purchases, SQLite, Flutter TTS

Architecture & Principles: Clean Architecture, SOLID, OOP, data structures, algorithms, modular design, reusable components

Tools & DevOps: Git, GitHub, Android Studio, Postman, Google Play Store, Apple App Store, Agile, Scrum

PROFESSIONAL EXPERIENCE

Zapplogics Solutions LLP

Aug 2025 – Apr 2026 (9 months)

Flutter Developer

- Engineered and maintained 3+ cross-platform Flutter applications for Android and iOS across restaurant, travel, and education domains, reducing development time by 40% through reusable widget libraries and clean architecture patterns.
- Integrated Firebase Authentication, Cloud Firestore, Realtime Database, and FCM with REST APIs; resolved 30+ critical bugs and improved app crash rate by 25% through systematic debugging and performance profiling.
- Collaborated with UI/UX, backend, and QA teams in an Agile environment to deliver features iteratively; managed end-to-end release cycles on Google Play Store and Apple App Store with zero critical post-release defects.

Tech Yard Labs

Nov 2024 – Jun 2025 (8 months)

Mobile App Developer — Flutter / FlutterFlow

- Developed, published, and maintained 15+ Android and 7+ iOS production apps achieving 10K+ downloads each — including Bharat News First ([Play Store](#)), Cyber Youth News, India 7 Live News, Khoji Narad News, Narad Post News — integrating REST APIs, FCM push notifications, and deep link navigation.
- Owned complete mobile app lifecycle across UI implementation, Flutter and FlutterFlow development, REST API integration, testing, deployment, bug resolution, and performance optimisation, delivering projects 20% faster than estimated timelines.

SELECTED PROJECTS

TablePilot — Restaurant Management & Booking Flutter · Riverpod · Firebase · AWS S3 · In-App Purchases [GitHub](#)

- Architected a scalable B2B2C restaurant management ecosystem with a live dynamic floor engine (0-conflict state machine), RBAC (Owner/Staff/Guest), interactive table booking with atomic transaction integrity, and real-time order tracking across 13+ modules — reducing table turnaround time by 30%.
- Engineered an AWS S3 media pipeline with client-side pre-compression, a PDF revenue analytics engine, a smart offers marketplace with tiered discount math (BOGO, % OFF, Fixed), In-App Purchases, and Firebase Auth — achieving sub-100ms data sync latency and 15K+ active monthly transactions.

Backpackr — Location-Aware Travel & Social App Flutter · Firebase Realtime DB · Google Maps · Cloud Functions · Geolocator [GitHub](#)

- Built a real-time travel social platform with a custom Haversine formula-based proximity engine (200km radius) client-side — eliminating map API costs entirely — with live traveller discovery, instant Firebase messaging, proximity-based filtering, meetup lifecycle management, and expense-splitting workflows.
- Implemented a double opt-in 'Wave' connection mechanic, community event management, travel blog with multimedia support, and Cloud Functions for low-latency push updates and live connection tracking.
- Integrated Firebase App Check to prevent unauthorized backend access; built a dual-stream monetization engine with native IAP supporting consumable trophy purchases and lifetime premium memberships — achieving 2x revenue streams with zero exposed credentials.

Content Planner Plus — Smart Productivity App Flutter · Firebase · Riverpod · Provider · fl_chart · SQLite [GitHub](#)

- Built a mobile-first content planning app with calendar-driven scheduling workflows, multi-platform publishing task management, campaign segmentation, repeatable publishing cadence flows, and API-based data sync for content state persistence.
- Integrated Firebase Auth (Email + Apple Sign-In), local notifications with timezone support, fl_chart analytics dashboards, automated PDF report generation, In-App Purchases, and offline-first SQLite architecture — 100% offline functionality.

- Sanatan Aarti — Hindu Devotional & Spiritual Companion App** Flutter · Provider · Firebase App Check · Crashlytics · Flutter TTS · Google Mobile Ads · IAP
- Architected a 5-in-1 devotional ecosystem live on Play Store ([Play Store](#)) with 1,000+ active downloads; covers 20+ Hindu deities with TTS audio recitation, a devotional photo frame studio (Pro Image Editor + Matrix Gesture Detector), live temple darshan portal (Ayodhya Ram Mandir), daily Hindu Panchang with Tithi/Nakshatra/Shubh Muhurat, and smart puja reminders.
 - Engineered a dual-language (Hindi & English) localization engine with AppLocalizations and Flutter TTS for offline-ready mantra recitation; implemented enterprise-grade security via Firebase App Check (Play Integrity) and real-time crash diagnostics with Firebase Crashlytics.
 - Integrated Google Mobile Ads SDK (Banner, Interstitial, Rewarded) and native Play Billing IAP for lifetime premium upgrades; implemented deep-link referral attribution system and MediaStore API for secure high-res gallery export — achieving 2x revenue streams and 100% offline capability.

- Countro — Personal Expense Tracker** Flutter · SQLite · Provider · Google Mobile Ads · In-App Purchases
- Delivered a premium personal finance app on Play Store ([Play Store](#)) — 500+ active downloads; offline-first SQLite architecture with instant transaction logging, battery-optimized Firebase sync (10-min interval), weekly/monthly analytics dashboard, and PDF/CSV export suite.
 - Integrated Google Mobile Ads SDK + native Play Billing IAP for dual monetization (ads + ad-free premium tier); custom income/expense category designer with dynamic colors and icons, multi-currency/language support, and localized scheduled notifications — achieving 2x revenue streams.
 - Designed and built a robust SQLite-to-Firebase Realtime Database sync engine with a periodic background timer supporting custom intervals (daily, weekly, bi-weekly); implemented strict data safety guards preventing accidental cloud wipe on empty local states, network checking, and optimized local storage tracking via ValueNotifiers.

- News Portal Mobile Apps** Flutter · FlutterFlow · WordPress REST API · FCM
- Developed and deployed 15+ production Android & iOS news apps using Flutter and FlutterFlow; integrated WordPress REST APIs and custom endpoints for article feeds, category navigation, banners, and real-time publisher-controlled content — each app achieving 10K+ downloads.
 - Live apps: [Bharat News First](#), [Cyber Youth News](#), [India 7 Live News](#), [Khoji Narad News](#), [Narad Post News](#), [Tehelka India News](#), [Headlines247](#), [Hill Mail News](#) & more.
 - Delivered responsive reading flows (feed, category, article detail), FCM push notifications, deep link navigation, and full App Store + Play Store releases — fast iteration via FlutterFlow visual development workflow.

EDUCATION

B.Tech — Computer Science Engineering Oct 2020 – Jul 2024
College of Engineering Roorkee | Affiliated to Uttarakhand Technical University | Haridwar, India

CORE COMPETENCIES

Problem Solving | Debugging & Performance Optimization | Agile & Scrum | End-to-End Mobile App Delivery | Cross-Functional Team Collaboration | Code Reviews | Mobile Security
