PROFESSIONAL SUMMARY

Flutter Developer experienced in building and publishing production-ready Android and iOS applications using Flutter, Dart, FlutterFlow, Firebase, REST APIs, Google Maps API, and AWS S3. Delivered news, real estate, restaurant, travel, education, and location-aware social apps with responsive UI, real-time data sync, push notifications, app-store deployment, performance optimization, debugging, and post-release maintenance.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, FlutterFlow, Android, iOS, responsive/adaptive UI, reusable components

Firebase & Cloud: Firebase Authentication, Cloud Firestore, Realtime Database, FCM, Cloud Functions, AWS S3

APIs & Integrations: REST APIs, Flask APIs, Google Maps API, geolocation, notifications, news feeds, media handling

Tools: Git, GitHub, Play Store, App Store

Other: Python, C, C++, C#, ASP.NET, Django, HTML, CSS, Selenium, BeautifulSoup

PROFESSIONAL EXPERIENCE

Mobile App Developer - Flutter / FlutterFlow | Tech Yard Labs

- Developed, published, and maintained 15+ Android apps on Google Play Store and 7+ iOS apps on Apple App Store, mainly dynamic news portal applications with clean UI and cross-platform support.
- Built and launched a real estate listing and selling app with responsive user flows, structured property data, and media-focused mobile screens.
- Owned the app lifecycle across UI implementation, Flutter/FlutterFlow development, REST API integration, testing, deployment, maintenance, bug fixing, and performance improvements.
- Delivered large-scale apps including Bharat News First, Cyber Youth News, India 7 Live News, Khoji Narad News, Narad Post News, and others with 10K+ downloads each.

Flutter Developer | Zapplogics Solutions LLP

- Developed and maintained cross-platform Android and iOS apps across restaurant, travel, and education domains using Flutter.
- Implemented Firebase Authentication, Cloud Firestore, Realtime Database, and FCM for secure login, real-time data sync, live updates, and push notifications.
- Integrated Google Maps API for location-based features and AWS S3 for scalable media storage; optimized load times, fixed critical bugs, and improved app stability.
- Collaborated with UI/UX, backend, and QA teams while following clean architecture, reusable components, and production-ready development practices.

SELECTED PROJECTS

Location-Aware Social / Travel App - Flutter, Firebase, Geolocation, Cloud Functions

[Project Repository](#)

- Architected a location-aware social ecosystem for travelers to discover nearby users, coordinate meetups, exchange "Waves," and share experiences using 200 km proximity-based filtering.
- Integrated Firebase Realtime Database and Cloud Functions for instant messaging, live connection tracking, community events, and low-latency updates.

News Portal Mobile Apps - Flutter, FlutterFlow, REST APIs, Push Notifications

- Built multiple production news apps with dynamic content feeds, category browsing, clean navigation, responsive layouts, real-time updates, and app-store-ready builds.

EDUCATION

Bachelor of Technology - Computer Science Engineering | College of Engineering Roorkee

Oct 2020 - Jul 2024

Recognized by AICTE; affiliated to Uttarakhand Technical University | Haridwar, India | 65%

Class XII - UK Board | Saraswati Vidya Mandir Inter College, BHEL Ranipur

2019 - 2020

Haridwar, India | 69.2%

ADDITIONAL STRENGTHS

Problem solving | Debugging & optimization | Pressure handling | End-to-end mobile delivery | Team collaboration
